kids create kid's story about robot

Basic 6

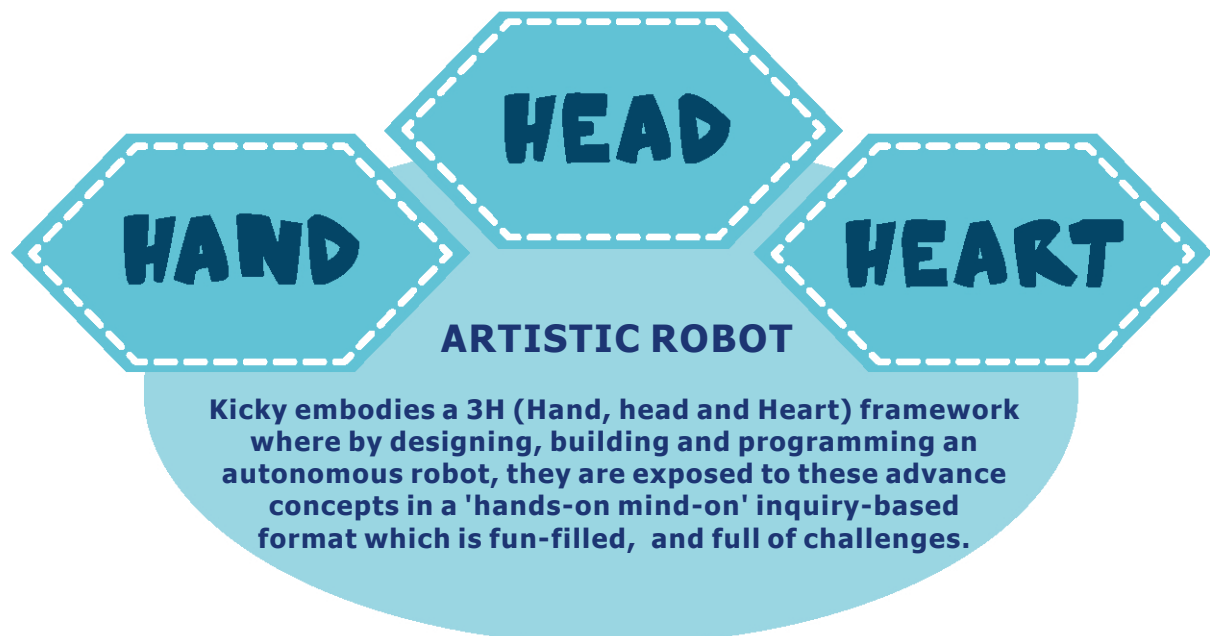

What is Kicky?

Kicky educational robotics series is a combination of robot assembling and early childhood integrated programs that encourage our children to learn, explore and build a foundation for a bright future.

Another smart kit presented by

Basic Series - Lesson 11

The Frog and The Mouse

Read the fairy tale and learn a lesson.

1. < Mouse >

**Mice are afraid of water.
Create a mouse.**

2. < Eagle >

**Eagles have sharp beaks and claws.
Create an eagle.**

Today's lesson: Friends look out for each other.

The Frog and The Mouse

The frog and the mouse are close friends. They meet everyday to have fun. They promised each other to go anywhere together. So they got their ankles tied together.

“Where shall we go to play today?” asked the mouse. “I want to go swimming,” answered the frog. “But I’m terrible at swimming,” said the mouse. “It’s okay, I will try to learn.” The frog assured the mice that it will be fine and not to worry.

With fear, the mouse jumped into the water with the frog. Plop, plop, was the sound as the frog swam deeper under the water. Meanwhile, the mouse was struggling to stay above the water but it drank too much water and died.

Suddenly a hungry eagle saw the mouse floating above the pond. It flies down to catch the mouse. Unfortunately, the frog was tied to the mouse and so the frog also became the eagle's prey.

Let's build it.

1. Mouse

Mice are afraid of water. Create a mouse.

A mouse is a small mammal belonging to the order of rodents, characteristically having a pointed snout, small rounded ears and a long hairless tail. It is also a popular pet.

Move the robot **Mouse**

1. Connect DC motor to Left motor connector.
2. Connect battery case to Power connector.

Press the Mini-board button
to move the mouse.

I Learn.

● Match the puzzle pieces.

Let's build it.

2. Eagle

Create a sharp beak eagle.

Basic Series - Lesson 12

1. < Auto Car >
Create a moving car.

2. < Ferris Wheel >
Create a Ferris wheel with a few capsules going round and round.

3. < Spinning Tea Cup >
Also known as the spinning cup which can be found at a funfair.

3. < Carousel >
Build a ride that rotates 360 degrees in the air.

Let's build it.

1. Auto Car

Create a car.

Move the robot **Ferris Wheel**

1. Connect DC motor to Right motor connector.
2. Connect battery case to Power connector.

Move the Ferris wheel.

Press the Mini-board button and the Ferris wheel will go round and round.

Let's do it.

- Which block is not required to create a Ferris wheel?

Let's build it.

3. Spinning Tea Cup

Tea Cup is a chair that can turn from left to right or the other way round.

Move the robot Tea Cup

1. Connect DC motor to Right motor connector.
2. Connect battery case to Power connector.

Move the Tea Cup.

Press the Mini-board button and the Tea Cup will go round and round.

Let's do it.

- There are numbers 1 to 10 on the chairs. Fill in the missing numbers.

Let's build it.

4. Carousel

Make the carousel rotate in the air.

Completed

Move the robot Carousel

1. Connect DC motor to Right motor connector.
2. Connect battery case to Power connector.

Move the swivel chair.

Press the Mini-board button and the carousel will go round and round.

Let's do it.

- Which picture below has the same rotation as the carousel?

Game Workshop 2

The windmill is using the natural wind driven by the windmill blades to rotate and generate energy.

Let's take a look at the various windmills and try to create a windmill yourself.

Carry water to irrigate farmland

Irrigation windmill

Set up in the windy zone

Generating windmill

The use of the principle of windmill

Ferris wheel

The windmill I assembled!

I'm KiKi, I can do it!

Activity photos.

A large, light green rectangular area with a dashed teal border, intended for students to paste their activity photos.
